

What's new in Kayxo Exchange Adapter for Microsoft BizTalk (KEAB)2.1:

- **Support for Public Folders:**Read or Write any Public Folder of your Exchange Server as simple as any other folder.
- **Security Roles:**You can now delegate the process of creating, maintaining and deleting KEAB Receive Locations and Send Ports to a BizTalk administrator.
- **Improved Load Balancing & Failover scenarios:**Take advantage of BizTalk Load Balancing capabilities to design an Enterprise Solution with KEAB.
- **Dynamic Send Ports:**KEAB now supports the creation of both Static and Dynamic Send Ports, so you can choose what the best option to your needs is.
- **BizTalk 2009, Windows 2008and SQL Server 2008 support:** Support for BizTalk Server 2009 (including Branch Edition), Windows 2008 and SQL Server 2008.
